FLD
31SUPPLEMENT TO
REPORT NO.

25X1X

During the course of a recent meeting of Yugoslav naval technicians in Split, the following points were discussed:

- a. Completion of studies of a light motor boat to be equipped with hydropulse motors.
- b. Tests carried out in January 1949 on a boat similar to torpedo boats.
- c. Excellent timing results from tests carried out between Fiume and the island of Brioni.

25X1A

~~Comment:~~ Although the text of this report does not specifically state that hydropulse motors are being applied to torpedo boats, this is inferred by the subject of the report as received from source, i.e. Water Propelled Torpedo Boats (Torpedni cunci na vlažni pogon).

25X1A

~~Comment:~~ Informant alleges that the engineer who constructed the "hydropulse motor" is now in Tivat, carrying out tests and experiments for perfection of this motor.
